Notes:

| Ratings Definitions   |   |  |
|---|---|--|
| Standby:  | Prime (Unlimited Running Time):   | Base Load (Continuous):  |
| rating is only applicable to variable loads with an<br>average load factor of 80 percent of the standby<br>rating for a maximum of 200 hours of operation<br>per year and a maximum of 25 hours per year at | load for an unlimited number of hours. A<br>10% overload capability is available for<br>limited time. (Equivalent to Prime Power in<br>accordance with ISO8528 and Overload<br>Power in accordance with ISO3046, AS2789,<br>DIN6271, and BS5514). This rating is not<br>applicable to all generator set models. | for unlimited hours. No sustained overload<br>capability is available for this rating. Consult<br>authorized distributor for rating. (Equivalent<br>to Continuous Power in accordance with<br>ISO8528, ISO3046, AS2789, DIN6271, and |

1. Limited single phase capability is available from some three phase rated configurations. To obtain single phase rating, multiply the three phase kW rating by the Single Phase Factor<sup>3</sup>. All single phase ratings are at unity power factor.

2. Standby (S), Prime (P) and (C) Continuous ratings.

- 3. Factor for the Single Phase Output from Three Phase Alternator formula listed below
- 4. Maximum rated starting kVA that results in a minimum of 90% of rated sustained voltage during starting.

## Formulas for calculating full load currents:

| Three Phase Output | Single Phase Output         |
|--------------------|-----------------------------|
| kWx1000            | kWxSingleP haseFactor x1000 |
| Voltagex1.73x0.8   | Voltage                     |
